SECTION ONE

Introduction

THE DESIGN GUIDELINES

The following booklet describes the visual identity of **Odyssey MIS**, created by Marketing Ideas For Printers. This includes logos, typography, color, and graphics.

Presenting a consistent, and well designed, interface builds brand integrity and trust with our clients. We are committed to always giving our clients high quality, consistent, and stylish design, without sacrificing functionality.

All elements presented within this document are valued company assets, and we are responsible for ensuring brand integrity throughout future deisgn by eliminating incorrect usage of any brand materials.

SECTION TWO

Logo Application

Application on a background

The Odyssey logo is displayed in a number of ways, including the full logo, logo symbol, and logo text. Clearspace is vital to the visual integrity of the Odyssey logo, therefore

the clearspace rules must be taken into consideration during the design, and coding, phases.

Application on a background

Application // Incorrect usage

The Odyssey logo must be dispalyed in accordance to the Application usage guide shown in the previous pages. Deviating from

that guide is prohibited, and a violation of the Copyright. Below are a few examples of incorrect usage of the Odyssey logo:

SECTION THREE

Typography

Typography // Fonts

Odyssey features two distinct fonts: Raleway, and FontAwesome, both fonts can be found on the MI4P server. This section will go into detail about how those fonts are utilized to create the look and feel of Odyssey's typography.

Spacing

& Line Height

Spacing and line height are vital to readability. Using these tools incorrectly will result in poorly designed paragraphs, headlines, and other page components. Spacing between letters should always be set to 0, unless text falls onto a white background. Then spacing between letters may be set to 10px-20px.

Color On Light & Dark BKG

Text appears on a number of different background colors within Odyssey. A good rule of thumb, to make sure that the font colors are visible on these backgrounds, is to make sure the CMYK value is at least 10% higher or lower than the current background color.

For example: 0, 0, 0, 0 (background) 0, 0, 0, **10** (font) Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nulla tincidunt accumsan varius.
